

Sign-in, Secure & Safeguard

The original award-winning touchscreen visitor management system

Signing In & Out as easy as 1-2-3

Overview

Replacing traditional paper-based visitor books, often found on reception desks, EntrySign™ simplifies the process of signing visitors, staff and students in and out of your site. EntrySign™ prints customised visitor passes and, at the same time, captures important information which can be viewed and used to generate detailed reports afterwards.

EntrySign™ will improve safeguarding within your school/college, office or organisation. EntrySign™ has features for managing known and unknown visitors, contractors, staff, students/pupils and residents (each function can be enabled or disabled as required). EntrySign provides you with a clear, instant and accurate view of exactly who is or was on your site at any point in time.

All EntrySign™ systems include front screen customisation featuring your logo, colour schemes, motto and even accreditation logos, for a unique design which matches the look and feel of your school or organisation.

Visitor Management

Checking visitors in and out has never been easier. Quick and easy visitor management with self-service touchscreen sign in/out.

Intuitive User Interface

Create a consistent brand identity with a front screen, fully themed by our in-house graphic designers.

Search Feature

We have developed our search feature to be efficient, effective and easy to use so that you can search for visitors, staff or contractors by name, company, or vehicle registration number.

Evacuation Report

When an emergency situation occurs you can make sure everyone is accounted for. With our one click fire evacuation report you can make sure everyone is safely outside the building and, relay the report to multiple printers and or email addresses.

1 Year Warranty

All of our EntrySign™ systems include a free one year warranty as standard, supporting both hardware and software for that complete peace of mind. Extended support packages are also available.

Safeguarding

Safeguard your organisation with the ability to look up historical data and even view photographs of your visitors and contractors quick and easily, at any point in time.

Remote Setup
& Training

We understand how important time is in a busy environment. Your EntrySign™ system will be configured remotely and online training provided at your convenience.

Desk/Wall Mount Solution

Built-In Camera

Take a picture of visitors and also read QR codes for quick visitor sign in/out.

Touchscreen PC

A compact 15.6-inch LED-backlit display for a crystal clear image.

Education

EntrySign™ for Education

EntrySign™ brings together all of the paper-based visitor management systems that you will currently use in to one unique and easy to use digital system.

Improve safeguarding in your school by having live, up-to-the-minute visibility of who is on site and a wealth of information and reports just a click away.

Staff, pupils and students, authorised visitors such as school governors, supply teachers or peripatetic teachers and even contractors can all sign in and out using dedicated options on the touch screen. The EntrySign™ Back Office Suite can also track CRB/DBS dates and other essential information.

EntrySign™ integrates with many popular school management information systems including Capita SIMS, Bromcom MIS, Scholarpack, RM Integris and Progresso, making administration simple and automating the process of importing staff and pupils into the system.

EntrySign™ can even write back to the MIS, where allowed. Pupil late marks can be entered or updated automatically including calculating the minutes late inline with your school's attendance policy.

If your school uses a different MIS which we don't currently support, our developers would be happy to talk with your MIS provider about integration. You can also import staff and

students quickly and easily using CSV files or by using our free Active Directory integration.

Business

EntrySign™ for Business

The EntrySign™ system has many benefits and features designed to enhance and improve your health and safety procedures. It has received universal praise from large companies and public sector organisations through to small and medium sized private businesses.

If you have an unattended reception area, EntrySign™ can ensure you still have a professional front-of-house for your visitors and deliveries. Functions specifically designed for this purpose will notify your staff by email or SMS when visitors sign in or delivery people and couriers are waiting in reception.

EntrySign™ is now used in many business, enterprise and corporate environments,

including offices, warehouses, factories, shopping centres and government organisations such as the NHS and Fire & Rescue services.

Administration is simple: quickly and easily import your staff from CSV files, or automate this with your corporate network using our free Active Directory integration.

Bolt-ons

Our range of bolt-ons allow you to expand your EntrySign™ system, whether you need additional sign-in points or accessories for events and busy reception areas.

If you can't see what you're looking for, please give us a call and we will discuss your requirements and advise you on the best solution.

Please note: above bolt-ons are not available for express systems

Additional EntrySign Screens

Additional EntrySign screens allow you to scale up your visitor management system by adding extra sign-in points, as required. Ideal for multiple entrances/exits or for busy reception areas.

- Theme and brand in line with primary screen
- Duplicate options from the primary screen or customise as necessary
- Add as many additional screens, as required to suit your premises and organisation

EntrySign™ RFID Terminal

The EntrySign™ RFID terminal is a compact, contactless terminal which provides functionality where a full touchscreen is not required, or where you would like additional terminals on your site.

- Discrete networked terminal for use with Mifare RFID card and fobs
- Perfect for staff entrances where the full functionality of a touchscreen is not required
- Can be used for staff, authorised visitors, approved contractors and students

Integrated ID Card Printing

EntrySign™ features an integrated ID card designer which makes it easy to create ID card layouts for ordering or printing in-house.

- Create your own ID card layouts within EntrySign™
- Capture staff and authorised visitor photographs directly into the back office suite using a webcam
- Quickly and easily order new or replacement cards directly from the back office suite
- Print your own ID cards with the optional ID card printing bolt on - no third party card printing software required

Dedicated QR Code Reader

- Rapid QR code acquisition
- Reads faded and creased QR codes from paper
- Reads QR codes from phone/mobile device displays
- Ideal add-on for high visitor volume environments and events

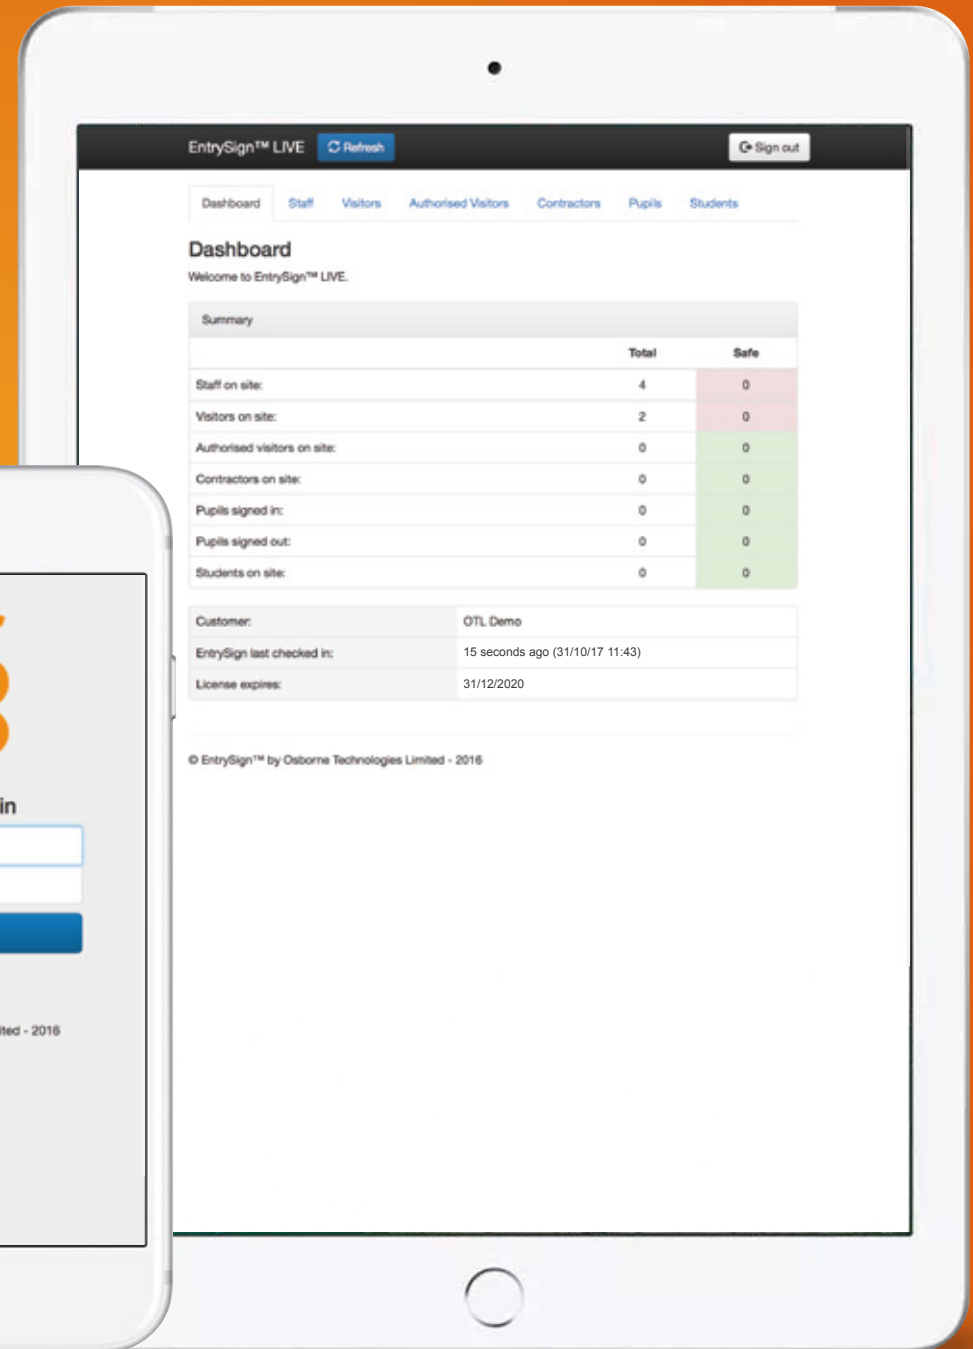

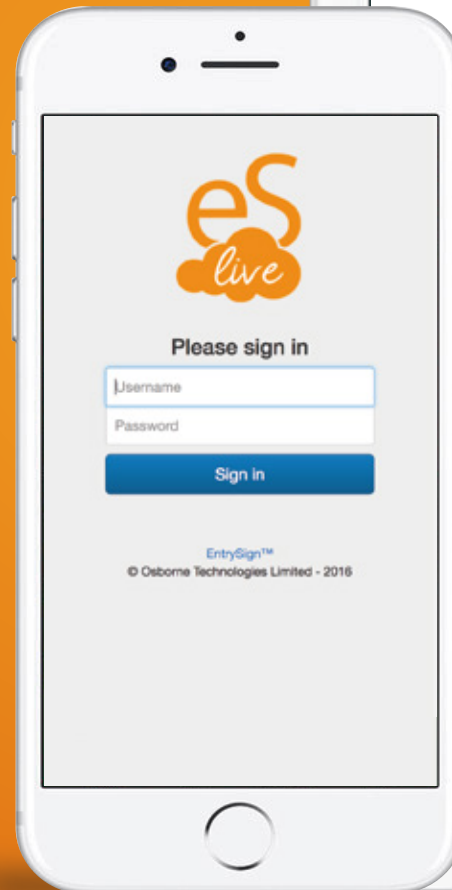

Bolt-ons

Introducing EntrySign™ LIVE *cloud-based evacuation & roll call*

Simple to use and clear, EntrySign™ LIVE provides evacuation and roll-call functionality from any internet connected devices such as iPads, tablets, phones and even laptops.

Using our new web-app you can quickly and easily see exactly who is on your site at any time from anywhere in the world. Initiate an evacuation roll call instantly with the very latest data synchronised from your local EntrySign™ system to the cloud.

EntrySign™ LIVE is an electronic equivalent to traditional paper-based evacuation reports. It provides a clear, easy to read overview of people who are signed into your site organised by type (e.g. visitors, staff, contractors, pupils etc.). Interactive roll-call functionality allows you to check people off, marking them as safe and provides an overview of who has been accounted for and a clear visual indication of any persons who haven't.

Accessories

A wider range of ID accessories are available, please contact us for a full brochure, or visit our website for more details.
